

Simple, practical, inspiring

A light touch is all that's required for opening

Perfecting motion  **blum**[®]

Hands full, pull-out closed ...

Does this sound familiar? You are right in the middle of cooking and want to create space on the worktop by throwing away some vegetable peelings. You stand in front of the closed waste bin pull-out with your hands full & you struggle to use the bin. That's all ancient history now.

Regular opening is often difficult when your hands are full, ...

... dirty handles and fronts are the result.

SERVO-DRIVE
inside

BLUMOTION
inside

... now there is a solution

Now waste bin pull-outs can be opened quickly and easily: With SERVO-DRIVE uno, the electrical opening support system. All you need is a light touch on the front with your hip, knee or foot. And BLUMOTION dampening provides complete perfect motion, pull-outs always close silently and effortlessly.

You can rely on SERVO-DRIVE uno – in any situation

You can relax in your kitchen

SERVO-DRIVE uno has an integrated feature that prevents unintentional opening. And when cleaning the fronts, SERVO-DRIVE can be deactivated via a switched outlet.

Safety is assured

The sensitive collision detection feature reacts reliably: The opening sequence is immediately interrupted when an obstruction is detected.

Power consumption is negligible

SERVO-DRIVE uno power consumption is a joy to behold – because standby consumption is very minimal (only 3,5 kWh per year).

Simple to install

All you need is a Blum pull-out (TANDEMBOX or TANDEM with BLUMOTION and 41 mm space requirement behind pull-out back) and a power outlet.

A power cut causes no problems!

If the electrical supply fails, cabinets equipped with SERVO-DRIVE uno can be opened manually at any time.

You can be sure of the quality

The TÜV-certified drive technology was specially developed for everyday kitchen use. We provide a 5-year Blum warranty on all electrical components.

Can be utilised in other areas

SERVO-DRIVE is available for drawers, pull-outs and lift systems. Other living areas can also be equipped with SERVO-DRIVE.

Assembly is fast & easy!

SERVO-DRIVE is completely pre-mounted and easily installed. That's why this opening support system is quickly fitted no need for measuring or drilling. Also ideal for retrofitting.

Attention to detail & safety

We even thought about safety under the sink: we added an integrated dripping water protection feature in case water finds its way into the cabinet.
